

Study program		Study cycle	First study cycle				
		Orientation	Regional and Spatial Planning				
<b>SUBJECT</b>							
Subject name		<b>Contemporary Problems of Regional Development in the World</b>					
Subject code	Semester	Subject status		ECTS credits	Contact hours		
RPP-404.7-2	VII	optional		2	50		
Prerequisites		-					
Assigned professors and assistants	Subject Leader		<b>Dr. Sc., Senada Nežirović</b> , associate professor				
	Teaching Assistants		<b>MA Amina Sivac</b> , Senior Teaching Assistant				
Subject objectives	Fundamentally, a diligent and capable regional and spatial planner has to understand the basics of regional geography, but it is also important to understand contemporary problems, conditions, events and processes both in our environment and at the global level. Bosnia and Herzegovina is a part of global processes, and its inclusion in global integrations is very significant. One of the important tasks of this subject is for students to recognize contemporary political-geographical problems in the world, i.e. their consequences for regional and bilateral relations between countries of different regions and solving these problems on the way to their integration into the European Union and NATO. It is of special importance for students to acquire knowledge of different models and approaches to solving these problems, but also to acquire knowledge of global and regional problems of the countries of the world, and on the causes and consequences of differentiated development based on political, social and economic processes.						
<b>SUBJECT CONTENT</b>							
#	Teaching units			Contact hours			
				L	P	S	C
1	Introduction to the modern concept of global and regional development in the world			1	1	1	
2	Methodological approach in the classification of countries by level of their development			1	1
