Subject objectives	Introducing fundamental psychological terms to students with special reference to applicative psychological insights related to teacher work. One of the most important areas of human interest for cognition is area of his psychological life. As <i>homo sapiens</i> , human being has been permanently endeavoring to comprehend nature that surrounds him, just like his relationship with that environment. Thanks to modern psychology, psychic reality is accepted today as part of general reality, that is synthesis of natural and social reality. Fundamental psychological knowledge is increasingly applied in various spheres of human activities.
